What are your recommendations for the instructor to improve his/her delivery of this course?

I think the instructor did a great job of pacing himself based on the various levels of expertise in class. I probably could have used more assistance, but since I was late, I chose to take it upon myself to catch up with everyone else.

What are your recommendations for improving the course content?

This content was probably presented during the first hour of class. I was not present during this time - so I felt a little behind during class.
